DETAILED ACTION

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bass et al. Note figure 19 in Bass et al which shows grooves on inside of shield 86b, see column 19. Note angled protrusion 294b in the shield cap distal end. Note that these gas passages are angled or directed outward from the torch, as per claim 12, which is also construed as axial. AS per claim 14 the shield cap is construed as the secondary spacer, barring further description of the same.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Offer 5,852,271. note that the skirt is flexible as claimed and would block splatter from adjacent torches.

Response to Arguments

Applicant's arguments with respect to claims 9-17 have been considered but are moot in view of the new ground(s) of rejection.
